Taking benefits from over 60 years of experience and using the latest and the best equipped machinery, facilities and know-how, Pooya Industrial Group has become known as a pioneer in technology and quantity of production in the compressed Wood Sheet Industry (particle board and MDF) in Iran. At present, more than 40 percent of the Iranian market share is held by this Industrial Group.

The subsidiary companies Of this Group are as follows:

- Palar Company Melamin Sazeh Pooya Company
- Pooya Choob Company Aria pooya Company with the Trade Name "Parco"

Palar Company_____

Palar Company which is the first subsidiary company of Pooya Industrial Group started its activity in 1960. Taking advantages Of the latest machinery Of the year and updated technology Of Funder Company (Austria), this company has produced different types of impregnated paper with an annual capacity of 60 million sq. m. Furthermore, it has the nominal capacity of more than 14000 sheets per day by operating the twin veneer lines manufactured by Wemhoner Company (Germany) with the possibility of making both MDF and particle board veneers. The products of this company enjoy a vast variety of design and color. The dimensions of the products are according to the following table.

Material	Dimensions(m)	Thickness(mm)
PB	3.66 x 1.83	8-38
MDF	3.66 x 2.10	8,16,25
MDF	2.44 x 1.83	8,16,25

Material	Dimensions(m)	Thickness(mm)
PB	4.20 x 2.10	8-38
PB	4.20 x 1.83	8-38
PB	3.66 x 2.10	8-38

Pooya Choob Company—.

This company started its activity in Fall 2001 with Italian machinery and a multi-stage press machine. In 2009, upon development Of the technology in the world, the first continuous type press machine with the European technology was installed and operated by this company at the same time in Iran. Taking benefits from the machinery equipped with the fully-automatic control system and working with experienced and educated personnel, Pooya Choob has the largest particle board production capacity in the Middle East with the daily production capacity of 1400 M3 of particle board according to the international standards and it is capable of producing different types of raw particle board. Pooya Choob Company is the only producer of EI particle board in Iran and its formaldehyde release is at the standard level of developed European countries.

Types Of Raw particle Board

Length	2.20 to 4.40 m
Width	1.83 to 2.20 m
Thickness	4 to 38 mm

Compliance With Global Standards (EN)

Tensile Strength	3.5 kg / cm ²	Thickness Tolerance	± 0.3mm
Flexural Strength	130 kg / cm ² (in 16 mm thickness)	Dimensional Tolerance	± % 1

Quality tests for Melamine Faced Particle Boards.

Test Name	Standard	Test Objectives
Graphite Test	EN - 14322	Study of resistance against staining
Acid Test		Study of resistance against acids and detergents
Hot Oil Test		Study of resistance against indirect contact with heat (e.g. through hot dishes)
Steam Test		Study of resistance against steam
Knife Test		Study of resistance to delamination of the decorative surface layer and cut edge
Abrasion Test		Study of the resistance of melamine lamination surface against abrasion
Cigarette Test		Study of the resistance and strength of lamination surface against source of direct heat (e.g. Cigarettes)
Wrapping Test		Study and control of wrapping of products

Available Chrome Plates: • Barfi • Sabouni(Matt) • Egger(Barjesteh) • Prizma • Freeze • High Gloss • **Super Matt** NEW
